

POWER DISTRIBUTION AND CONTROL SYSTEM PARAMETERS OF ROTARY ATOM

BästDry Tech brand rotary atomizer provides a complete set of power distribution and control cabinet, in which VVVF and control system are designed. We can also equip PLC control system according to customer needs.

We are equipped with professional cables for rotary atomizers with industrial connectors, which can greatly shorten the repair and maintenance time of rotary atomizers through the application of industrial connectors.

The distribution control cabinet of BästDry Tech brand has loose requirements for the use environment. In the environment of 20 – 50 °C, the air conditioning system/cooling system equipped with the distribution control cabinet can effectively cool down, making the failure probability of the distribution control cabinet very low. At the same time, it can be used in the environment with high dust in the air through the dust filtering system of the power distribution control cabinet.

The distribution control cabinet of BästDry Tech brand can reach the protection level of IP56.

The electrical components inside the distribution control cabinet of BästDry Tech brand are from ABB, a well-known supplier of electrical components. We believe that the reliable and stable performance of electrical components can be effectively improved by using electrical components from well-known suppliers.

We are also willing to use other well-known brand electrical components recommended by customers.
